Chromeleon CDS extension

Roundabout

24/7 continuous data acquisition and reporting   AO100 v1.1

Roundabout enhances Chromeleon CDS by automating sample list generation, streamlining analytical workflows, and supporting continuous system operation. It also features integrated auto-calibration and automated summary reporting for improved data accuracy and compliance.

Roundabout software option for infinite data acquisition and reporting

Key features include:

• Automatic generation of sample lists for uninterrupted operation

• Advanced summary reports for comprehensive data reporting and quality charting

• Automatic re-calibration based on system performance

• Result verification against predefined acceptance limits

• Time stamping for each injection

• Tracking of injection counts for audit and maintenance purposes
